Environmental Health and Safety

Maintaining your organization's business objectives and operating its safety function most advantageously is crucial to remaining competitive in any industry. You must provide a safe working atmosphere for all employees. In order to keep up with the fluctuations in the realm of health & safety, it is often cost effective to partner with an environmental, health, and safety expert to assist you with managing this overwhelming, but imperative task.

EHS Support's Health & Safety team is focused on providing cost-effective and comprehensive risk mitigation strategies that surround your complex worker and facility protection needs.

Our proven record is a result of our extensive experience and knowledge across all industry sectors, enabling us to customize solutions to fit the uniqueness of each organization. While there are regulatory components in all of our services, the primary focus is to eliminate injuries to the workforce, improve financial performance, and reduce liabilities for each of our clients.

In the core of our partnership, we must focus on more than inspections and accidents in order to produce the needed results. EHS Support provides a full circle of Health & Safety services which include:

- Health & Safety Management Systems
- Health & Safety Program Development & Implementation
- Regulatory Compliance and Enforcement Assistance
- Regulatory Interpretation and Support
- Mock OSHA Audits and Inspections
- Company Specific Health & Safety Training
- Leadership Training and Coaching
- Industrial Hygiene
- Safety Committees
- Behavior Based Safety
- Workers' Compensations Reduction Programs
- Hiring Process Development.

Contact [Monica Meyer](#) today to learn more about how we can help you manage your environmental compliance risk.

Safety Management Systems

EHS Support assists clients to develop and improve the performance of their Occupational Safety and Health Management Systems. A detailed safety and health audit of policies, programs, record keeping, training records, and loss data is an imperative step in order to improve performance. The audit results are used to develop a management action plan that will ensure improved performance and provide dramatic return on investment and maximize the impact on our client's bottom line.

Mock OSHA Audit and Inspection

In order to prepare your company for an OSHA inspection, EHS Support will conduct a mock OSHA inspection with one of our highly qualified safety and health consultants. The purpose of this visit is to identify potential costly violations and also to make sure your employees are working safely.

We will conduct a safety evaluation onsite to determine potential OSHA violations. We will also inspect your company's documentation including the health and safety programs, training logs, new hire training records, and injury and illness logs. Upon completion, your company will receive a detailed report that indicates the noted deficiencies. EHS Support will then partner with you to assist in managing these deficiencies to closure.
