How to Conduct a Safety Stand-Down

Suggestions to Prepare for a Successful Stand-Down

1. **Try to start early.** Designate a coordinator to organize the stand-down. If you have multiple work sites, identify the team that will lead the stand-down at each site.

2. **Think about asking your subcontractors, owner, architects, engineers, or others** associated with your project to participate in the stand-down.

3. **Consider reviewing your fall prevention program.** This will help provide a more effective stand-down.
   a. *What types of falls could happen:*
      - Falls from ladders
      - Falls from a roof
      - Falls from a scaffold
      - Falls down stairs
      - Falls from tripping over cords, tools, uneven walking surfaces
      - Falls from slips
      - Falls from taking shortcuts
   b. *What needs improvement?* Is your program meeting its goals? Are you experiencing fatalities, injuries, or near misses? Are employees aware of the company's fall protection procedures?
   c. *What training have you provided to your workers?* Does it need revision?
   d. *What equipment have you provided to your workers?* Is better equipment available?

4. **Develop presentations or activities that will meet your needs.** Decide what information will be best for your workplace and workers. The meeting should provide information to workers about hazards, protective methods, and the company’s safety policies, goals and expectations. Hands-on exercises (a worksite walkaround, equipment checks, etc.) can increase retention.

5. **Decide when to hold the stand-down and how long it will last.** Decide if the stand-down will take place over a break, a lunch period, or some other time.

6. **Promote the stand-down.** Try to make it interesting to workers. Some employers find that serving snacks increases participation.

7. **Hold your stand-down.** Try to make it positive and interactive. Let workers talk about their experiences and encourage them to make suggestions.

8. **Follow up.** If you learned something that could improve your fall prevention program, consider making changes.
